

The Forest Recreation Ground Park Management

Park management

It is important that the Park is well looked after to ensure that it is clean, safe and attractive. More staff will be employed to look after the Park and the continued contributions of The Friends of the Forest will be important.

The presence of more staff will help to improve safety and reduce antisocial behaviour within the Park.

These are the proposals:

- Increase lighting to improve safety at night time
- Provide new CCTV cameras to reduce antisocial behaviour within the Park.
- Restrict cars from entering the Park to make sure that park visitors are safe and not at risk from cars.
- Increase opportunities for trainees and volunteers to work within the Park.
